ARMOR

About Us

> Grupo Armor

We are a corporation specialized in security. We are manufacturers and direct distributors of the most innovative equipment in the market.

We develop integrated solutions for specific problems, for private or government needs in the following areas:

- Vehicle Armoring
- Tactical equipment
- Inhibition
- Intelligent video surveillance systems
- Telecommunication solutions
- Specialized advisory on security
- Crime prevention

Grupo Armor Divisions

CAR ARMORING

About Us

Car Armoring started operations in 2004 in Tijuana, Baja California.

We design and build custom made security systems under strict quality control.

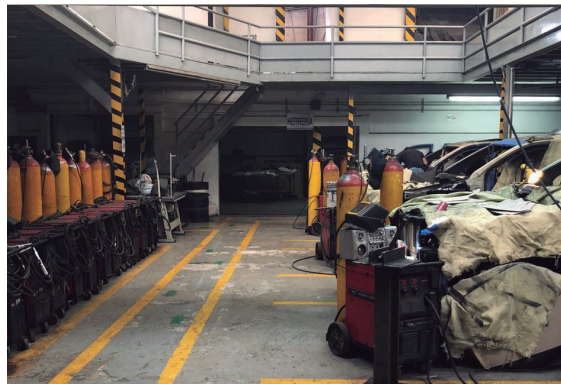

Vehicle armoring is our specialty.

Our team is comprised of highly trained professionals that receive continuous training, so we can provide you with a personal and private service. Our main goal is your security, while offering you the trust and discretion you need.

We have 2 industrial vehicle armoring facilities in Tijuana, B.C., as well as an area for maintenance which includes other post sale services such as mechanical service, body shop and paint.

Locations Car Armoring / Buena Vista Factory

Locations Car Armoring / Garita de Otoy Factory

Armored Vehicles

We armor all types of vehicles ranging from compact sedans to trucks.

We have both new and used vehicles available for immediate delivery.

Protection system under the **NOM Standard Shielding from Level B plus to Level E.**

Our constant search for specialized solutions has led to the creation of a technology and innovation department dedicated to the design of armored equipment.

Go take a look at our youtube channel / **Grupo Armor** to get more info on a custom made executive armored vehicle.

Sales

Car armoring has a fleet of vehicles at your disposal with the most recent models and level of armor that you require.

Our fleet includes different models such as: Chevrolet Suburban, Jeep Cherokee, Chevrolet Tahoe, GMC Yukon, and others, as well as different ballistic levels according to the needs of each client. (subject to availability)

Multipurpose Tank 9-16 passengers

(Shark Tank / Buffalo Tank)

Armored Areas

- Roof with ballistic steel.
- Sides with ballistic steel.
- Floor with ballistic steel resistant to fragmentation grenades.
- 4 doors with ballistic steel.
- High performance reinforced hinges with ballistic steel.
- Armored frame and counter frame.
- Front with ballistic steel to protect vital engine parts.
- Hood with ballistic steel.
- Armored glass.
- Gas tank with ballistic steel.
- Rear lights with ballistic steel.

Operational Accessories

- Run flats on 4 wheels.
 - Embrasures on sides and back with an easy open system and automatic closure with internal bolt.
 - Bench in cargo area.
 - Safety belts on cargo area.
 - 100 watt speaker siren .
 - 360 degree reflector with wireless control.
 - Multiuse compartment for guns, ammunition or first aid kit.
- Can be mounted on 450 or 550 gas or diesel chassis depending on armor level.

Shield Plus Patrol / Level D (NOM) Ford F-250 4x4

Armor description

- Doors and posts armored with ballistic steel.
- Roof perimeter armored with ballistic steel.
- Six curved armored windows with 45 mm thickness.
- Fuse box, main computer and brake fluid deposit armored with ballistic steel.

Accessories

- 4 embrasures (one per door).
- Safety belts on 4 doors.
- Run flats on 4 wheels.
- 4 all-terrain tires.
- Reinforced suspension with valved shocks (King brand).

Loading Area

- Side walls armored with ballistic steel and 4 embrasures (2 per side)
- Rear cargo door armored with ballistic steel
- Removable bench
- Kawasaki KLR650 motorcycle with camera and GPS, includes mounting base (Optional accessory)

Armored Transportation Service / Level C PLUS (NOM) - Ford Ranger

Armor description

- Armored doors and posts with ballistic steel.
- Perimeter of armored roof with ballistic steel.
- 34mm thick armored glass inked in original color.
- Low windshield armored with ballistic steel.
- Half armored fender with ballistic steel.
- Armored backrest with ballistic steel.

Accessories

- Four embrasures installed (one per door)
- 3-door safety belt: This system prevents maximum opening of the same.

Accessories

- Safe rolling system (Run Flats) in 4 wheels.
- Four all-terrain tires.
- Reinforced hinges, in order to offer the greatest comfort when opening and / or closing the doors.
- Reinforced suspension and valvulated dampers (King brand).
- The rear windows will have 1 peephole, (34mm glass).
- Right rear door, will be fixed and will have 1 access for pass-packets.
- Half box (armored cargo area with ballistic steel, same level) with access for packages from inside the cabin.

Truck Freightliner M2 / Level D (NOM)

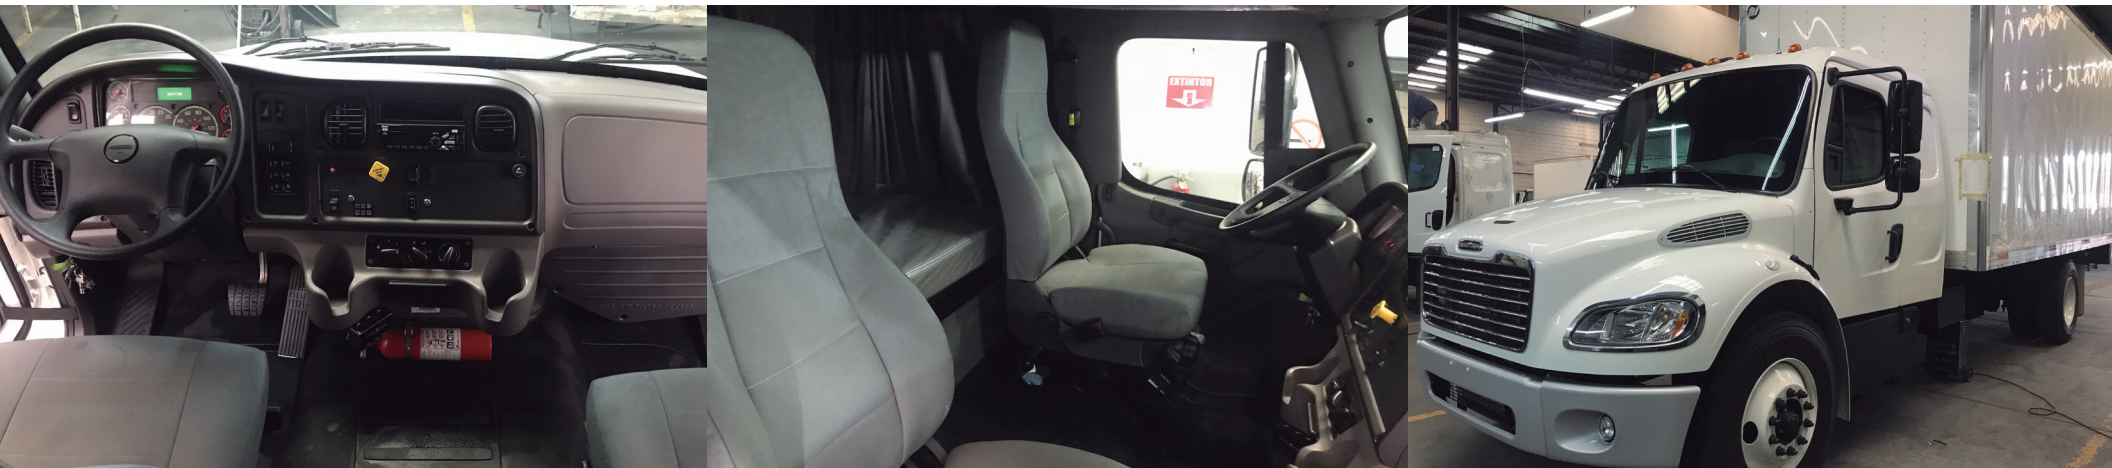

Armored Areas

- 40% Shielded radiator with ballistic steel.
- Battery and fuse box shielded with ballistic steel.
- Brake fluid computer shielded with ballistic steel.
- Pneumatic brake system shielded with ballistic steel.
- Fire wall armored with ballistic steel.
- Hydraulic steering oil tank, armored with ballistic steel.
- Armored antifreeze tank with ballistic steel.
- Armored engine cooling hoses with ballistic steel.
- Compressor box of armored pneumatic system with ballistic steel (Brakes).
- Air storage tank for armored brake system with ballistic steel.
- 2 armored doors with ballistic steel. Framed of the same material to close ballistic gaps.
- 3 45mm thick armored glass inked in original color (2 doors: pilot-copilot and windshield.)
- Roof and perimeter of armored roof with ballistic steel.

- Posts, trusses and backrest armored with ballistic steel.
- Reinforced hinges, in order to offer the greatest comfort when opening and / or closing the doors.

Operating Accessories

- Installation of safety piston driven by GPS.
- Pass documents in armored pilot door in ballistic steel.
- Reinforcement of arms for fuel tanks.
- Installation of 2 alpha numeric safes and key, placed inside the cabin.
- Installation of expensive candy box for DVR safeguards.
- Installation of 3 gas masks.

Maintenance

Our service center has a highly qualified team that ensures you total satisfaction and confidentiality in the maintenance of your armored vehicle.

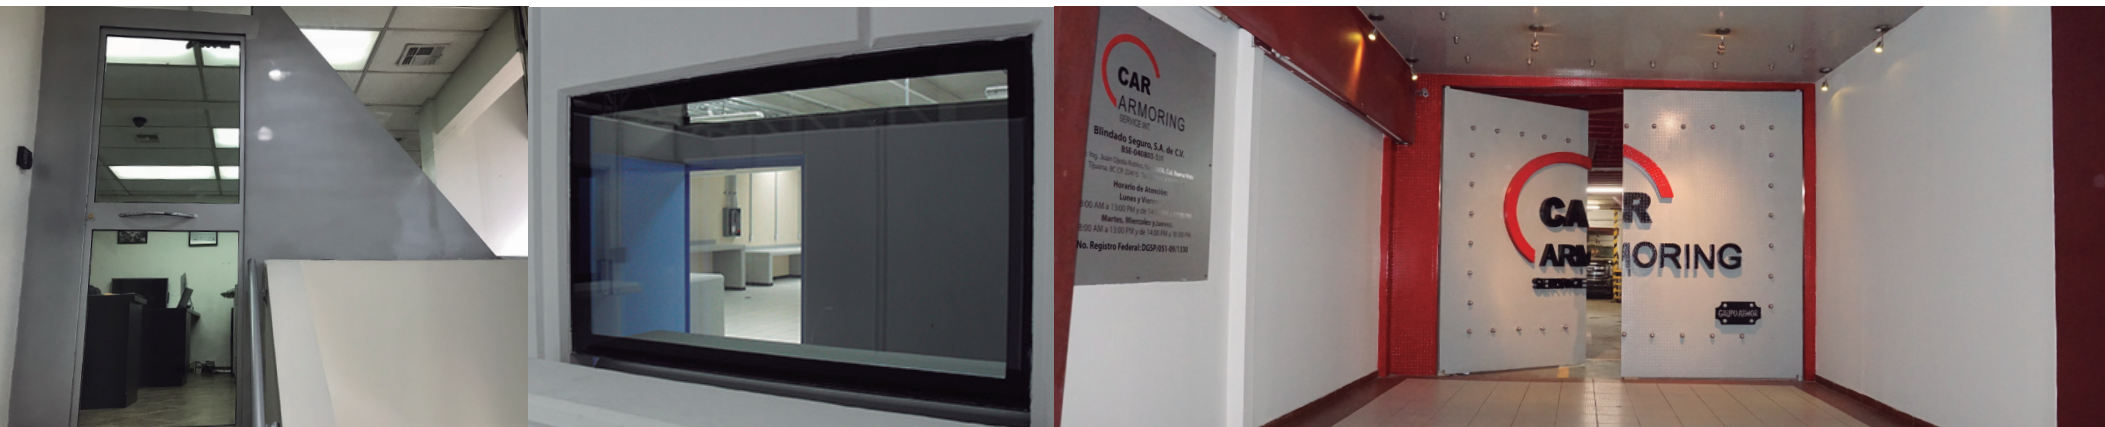

We offer a 30-point bumper-to-bumper diagnosis to evaluate the status of your armored vehicle, as well as many types of maintenance services with full coverage throughout the nation.

| Architectural Shielding

Design, construction and adjustment of architectural and engineering works.

- Armored security doors and windows with frames
- Smart houses
- Insulation and acoustic protection
- Original finishes
- Floodgate systems
- Armored guardhouse
- Electromechanical systems of documents and packages

FEMENINO

MOLLE

LCP

SNAKE

CROW

YAKU

Ballistic Vest Level III-A

Vest for external use **Level III-A**, in aramid shield, which allows an excellent stop of the bullet, an excellent stop of the trauma and is a low weight, high flexibility to adjust and adapt to the body of the user. the vest has a complete anti-trauma system.

- We have ballistic vest for **women** in **Level III-A**, with **NIJ certification 0101.06**
- Ballistic vest with **MOLLE** system
- Tactical ballistic vest
- Among others.

Ballistic Plate Level III - Level IV

Ballistic plate **Level III**, for chest and back are made of rigid laminated compressed ballistic polyethylene of the latest technology; it has a weight of **3.30 pounds**.

Ballistic Plate **Level IV**, external use for chest and back, these plates are made of ballistic ceramic with woven aramid backing, it has a weight of **8.15 pounds**.

All ballistic plates are certified by NIJ 0101.06

67 ELITE

TACTICAL EQUIPMENT

67 ELITE is a company that sells tactical and safety equipment offering quality in its products that are intended for the use of law enforcement, such as: police officers, special teams, undercover, special tactical equipment, military, and more. We currently commercialize national and international products.

We have a wide variety of equipment and accessories that are distributed and marketed in Mexico.

We have the distribution and direct representation of 36 of the most recognized brands in the United States, England and the Soviet Union

About Us

Bunker Soluciones is a vanguardist division that develops security solutions with trademark digital intelligence and cutting edge technological equipment for which we have exclusive distribution.

We specialize in integral projects in the areas of:

- Video surveillance systems (C2 and C4).
- Criminal inhibition.
- We offer telecommunications solutions.
- Access control.
- Digital tactical equipment.

Integral System for C5s monitoring, Control and Command Centers

This system includes:

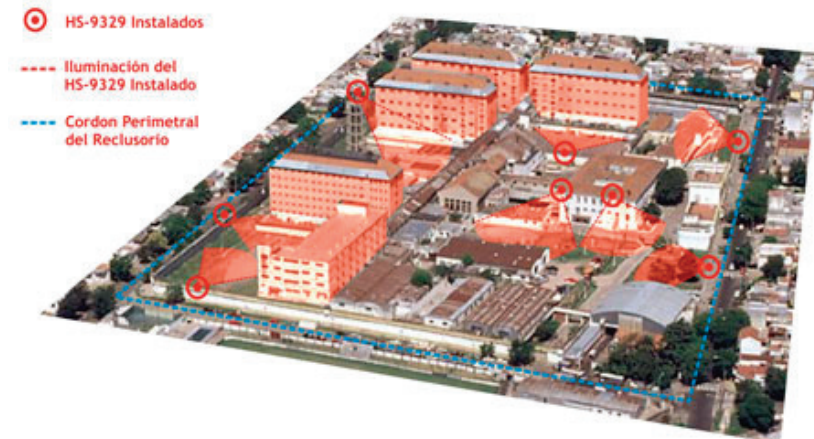

- Control panel.
- Demographic data capture
- Information (log) of inmates hourly
- Automatic biometric identification
- Analytical control and management
- Visit control
- Medical record control

Solution for prisons, What do we offer?

Cell Signal Inhibition (GSM)

- This cell inhibitor is for exclusive use inside prisons.
- Can work in high humidity areas and is water resistant for outdoor use.
- It has a special paint coating to protect the housing from the sun's UV rays and complies with the IP68 protection certification.
- Has a back heat sink to achieve an effective 24hrs operation without technical failures.

Video Analysis System

DIGIFORT

Available in standard, professional and enterprise versions, the DIGIFORT video analysis module can be used in several applications, such as: Public or private security, store theft, people behavior analysis, flow control of people and cars.

It is possible to identify things such as:

- Abandoned objects and removed from a certain site.
- Counting of people, cars and objects.
- Virtual barrier.
- Perimeter analysis.

Intelligent Video Surveillance Solution AVIGILON

Avigilon's self-learning video analysis solutions provide a high degree of accuracy in detection and classification of objects, thanks to numerous patented technologies, including advanced video pattern detection and learning technology with artificial intelligence.

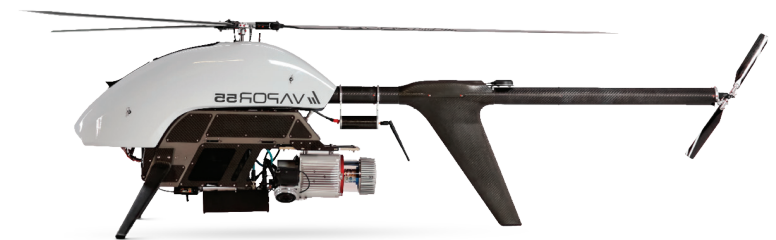

Unmanned aerial vehicles With Mapping System Drone

Geographic information with mapping system

This system has the virtue of generating ORTHOPHOTOS:

Presentation of aerial photographs conditioned on the same scale to represent an orthogonal projection of the terrain or 3d.

Remote Control Helicopter

Front Duo Platform

UAV Quad

Unmanned Aerial Vehicles

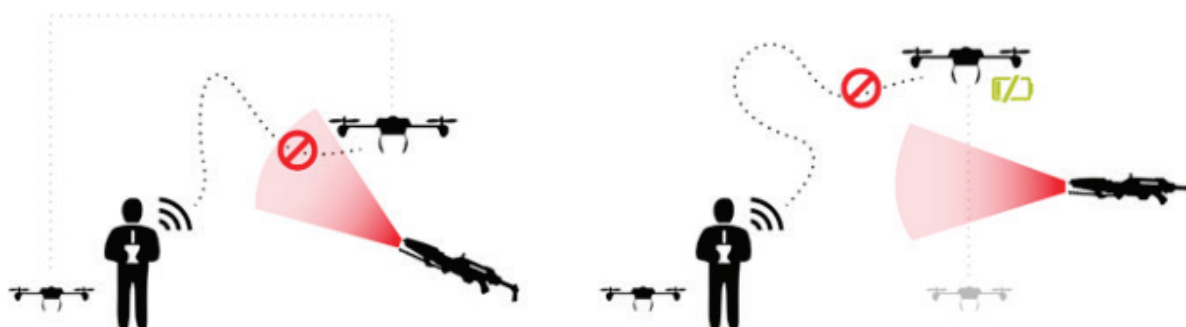

Drone Killer 120

ANTI DRONE JAMMER

The Drone Killer 120 is a countermeasure system that protects against intrusion drone, light and easy to use. the range of inhibition will depend on the distance between the radius and the drone itself, this means that the greater the range of inhibition it has a longer range. Tests performed with the Drone Killer 120 in optimal conditions, it was possible to block drones up to 790m away by grounding them or returning to their base point.

Features:

- Small, portable and lightweight, ergonomic design.
- Equipped with GAN technology power amplifier inhibition modules up to 20 w each enabled for frequencies in range of 20 to 600 mhz.
- Designed with the most advanced technology.
- Remote control.

Patrol Video Surveillance System

CCTV 360 COP

360 degree patrol camera system

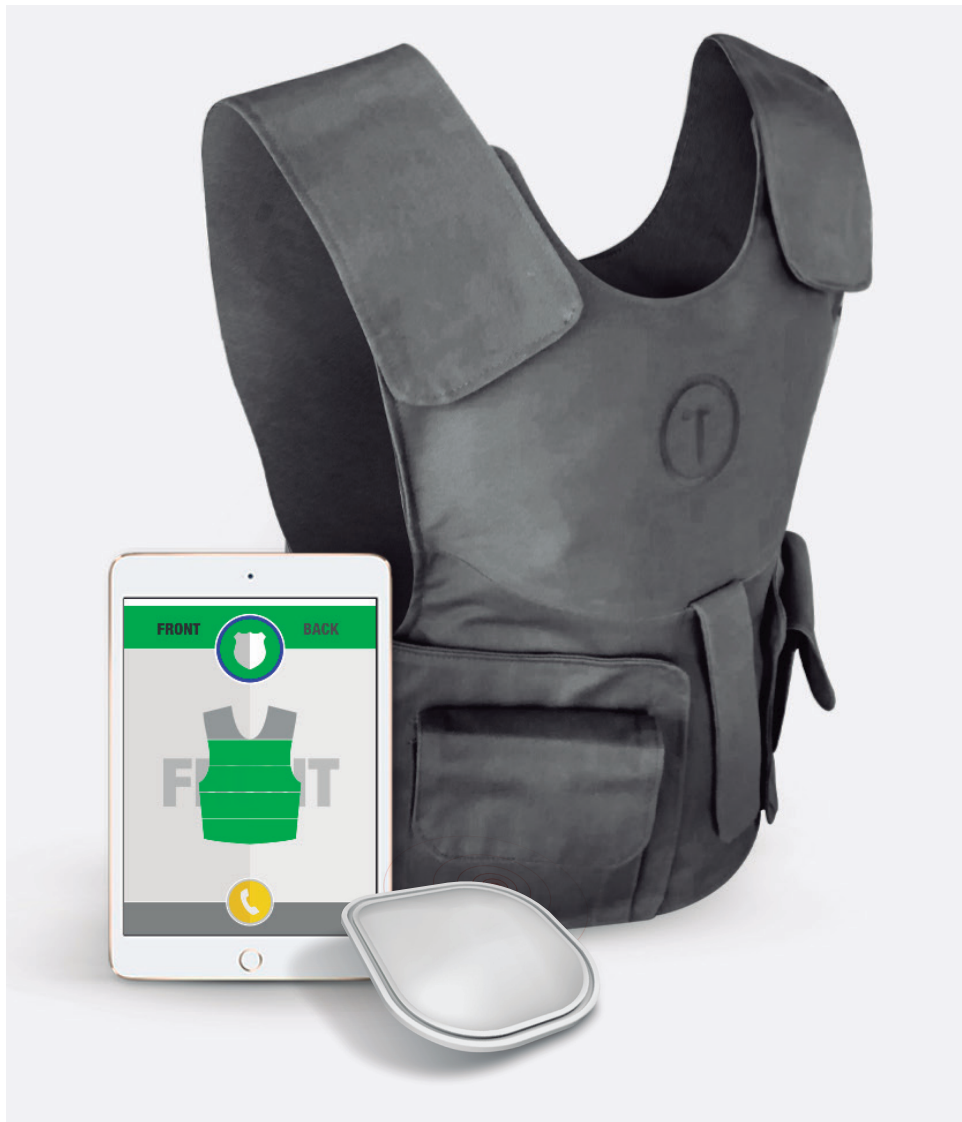

Components are:

- Frontal camera.
- Inmate camera.
- Rear camera.
- LPR camera.
- 360 degree camera.
- Mobile dvr 4g transmission to local monitoring and recording center.

Video Monitoring System from Police Vehicle:
Dual system that incorporates license plate number and other utilities.

Wearable Technology

How do we operate?

- 1.- Design & build textile hardware.
- 2.- Design & build electronic hardware.
- 3.- Assemble IoT & Wt solution.
- 4.- Platform access.

Key steps to commercialize

- 1.- Purchase order.
- 2.- Time to deliver, 60 - 90 days.
(Technology is customized to fit client needs)
- 3.- Immediate platform access to configure end users.

Software Enhancements Tech Package

Realtime monitoring functionality

* This package utilizes an IoT cellular module (provided) not attached to any of the *Wearables* to communicate with the platform.

What will you receive?

- ▮ 2 Wearables compatible with ballistic panels
- ▮ 2 Bluetooth communications modules
- ▮ 1 Cellular communications module: NB-1 & CAT-M1*
- ▮ Access to platform + enhanced features

Platform enhanced monitoring functionality**

-  Data storage and management
-  Customizable notifications
-  Impact Detection and Notification System
-  First Response notifications
-  Key Statistics
-  Ballistic protection performance evaluation
-  High-power ballistic threat detection and notification
